Eastern Pacific Ocean Vessel Registry Information : PAPERWORK REDUCTION ACT INFORMATION

This information is being collected to ensure that timely and accurate records about the fishing vessels of the U.S. that participate in fisheries under Inter-American Tropical Tuna Commission (IATTC) purview in the eastern Pacific Ocean are available. This will enable NMFS to provide information needed by the IATTC for a regional vessel register that will be used to support compliance and management analyses. Responses to the collection are required to allow NMFS to satisfy international obligations to provide this information to the IATTC. The information will also be useful to the Pacific Fishery Management Council program to develop a fishery management plan for highly migratory species fisheries off the West Coast. Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number. The public reporting burden for this collection is estimated to vary between 60-80 minutes per response, including the time for reviewing the form and instructions, searching data sources, furnishing missing data elements on the survey form, obtaining the necessary photograph, and mailing the information to NMFS. None of the information is deemed to be confidential. Send comments regarding this burden estimate or any other aspect of this collection of information to Rebecca Lent, Ph.D., Regional Administrator, Southwest Region, NMFS, 501 W. Ocean Boulevard, Suite 4200, Long Beach, CA 90802.
